9. Loharu
10. Kosli
11. Hathin
12. Hodal

Seats Transferred from INC to BJP:

1. Radaur
2. Ladwa
3. Asandh
4. Israna
5. Samalkha
6. Sonipat
7. Safidon
8. Tosham
9. Mahendragarh
10. Rewari
11. Faridabad NIT

Seats Transferred from JJP to INC and BJP:

Seats Transferred from JJP to INC:

1. Julana
2. Narwana
3. Tohana
4. Uchana
5. Uklana
6. Narnaud

7. Badhra

Seats Transferred from JJP to BJP:

1. Barwala

Highest and Lowest Margins for BJP and INC

BJP:

- Highest Margin: 121,724 votes in Badshahpur
- Lowest Margin: 1,654 votes in Asandh

INC:

- Highest Margin: 98,558 votes in Punhana
- Lowest Margin: 2 votes in Kosli

Mean Margin of INC and BJP

- Mean Margin for BJP: 25,023.45 votes
- Mean Margin for INC: 30,231.54 votes

These values represent the average margin of victory for each party across the constituencies where they are leading. Data indicates that INC had stronger hold in most of constituencies it was leading in.

Assembly Constituency wise table

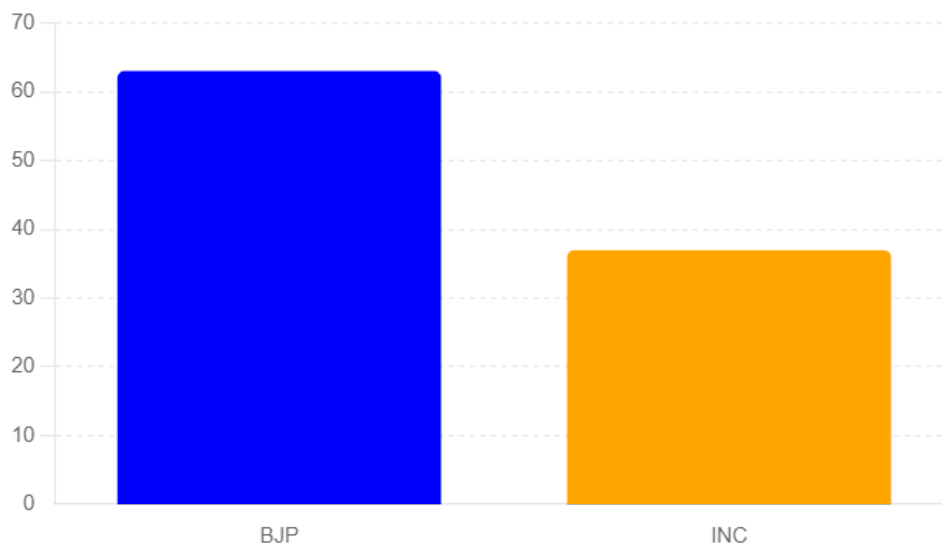

| Assembly Constituency | Incumbent MLA | Leading Party | Margin |
|-----------------------|---------------|---------------|--------|

| Ballabhgarh | BJP | BJP | 42695 |
| Faridabad | BJP | BJP | 35893 |
| Tigaon | BJP | BJP | 49428 |

Proportion of seats retained by INC and BJP:

The data may seem discrepant as INC+ has lead in 46 seats out of 90. Adampur seat has been exempted from the analysis due to it being won by INC originally but being held by BJP as Kuldeep Bishnoi resigned in middle of his term.

To describe the discrepancy given that INC + AAP are leading in 46 out of 90 seats, let's analyze the following aspects:

1. Total Seats Analyzed: Exempting Adampur means we are considering 89 seats.
2. Proportion Calculation: The proportion of seats retained should reflect the actual performance based on the leading and incumbent status.
3. Retention Rate: The retention rate specifically looks at how many of those seats that each party previously held were retained.

Analysis:

1. ****Total Seats****: With Adampur exempted, the total seats analyzed are 89.
2. ****Seats Leading****: INC + AAP are leading in 46 out of these 89 seats.

Calculation:

- Total Seats Considered: 89 (90 total - 1 Adampur)
- Seats Retained by INC + AAP: Calculate the number of seats where INC or AAP was the incumbent and is still leading.
- Seats Retained by BJP: Calculate the number of seats where BJP was the incumbent and is still leading.

Proportion of Seats Retained:

- For INC + AAP: $(\text{Seats retained by INC + AAP}) / \text{Total seats considered}$
- For BJP: $(\text{Seats retained by BJP}) / \text{Total seats considered}$

Let's recheck and perform these calculations.

Summary of Analysis:

1. Total Seats Considered: 89 (excluding Adampur)
2. Seats Leading by INC + AAP: 45 out of 89
3. Seats Retained by INC + AAP: 17 out of 89 (treating AAP as INC)
4. Seats Retained by BJP: 29 out of 89

Proportion of Seats Retained:

- INC + AAP 19.1% of seats (17 out of 89)
- BJP: 32.6% of seats (29 out of 89)

Discrepancy Description:

Although INC + AAP are currently leading in 45 out of 89 seats, the retention rate shows a different picture. INC + AAP retained only 17 seats (19.1%) where they were the incumbents. -BJP retained 29 seats (32.6%) where they were the incumbents, showing a higher retention rate compared to INC + AAP.

This discrepancy highlights that while INC + AAP may be leading in more seats currently, BJP has been more successful in retaining the seats they previously held. The leading count alone does not reflect the retention performance, which is crucial in understanding party stability and voter loyalty in incumbent constituencies.
